(cont'a.)	Program or Grant	IIE will administer a second grant from the Ford Foundation to send a delegation of American lawyers, under the chairmanship of Professor Milton Katz, Harvard Law School, to Marsaw for meeting of International Association of Legal Science, September, 1958.	IIE administers the U.S. programs for UMESCO Fellows. Currently one grantee from Yugoslavia in higher education; previously 3 muclear physiciats, 1 scientist, 1 composer, 8 educators.	IIE has established a committee to select U.S. participants for the Tebalkowsky International Competition for violinists and planists to be held in Moscow in March-April.	The Committee evented 120 grants in the past year for a month's travel by U.S. specialists in Boviet and East Central European fields to areas of their professional interest. Most grantees were affiliated with colleges and universities and represented 52 institutions. The Carnegle funds for this program have been expended but a few additional appointments may be possible this spring from Ford Foundation funds.	With a Ford Foundation grant, the Committee U.S. is arranging to recruit, screen, and make awards toward the cost of travel for 20 U.S. graduate students, competent in Russian area studies, to attend the University of Moscow or Leningrad in 1958-59; (30 in 1959-60). Expenses within the U.S.S.R. are provided by Soviet authorities. Amouncement of competition sent to

### Aide Memoire

The Embassy of the Union of Soviet Socialist Republics presents its compliments to the Department of State of the United States of America and has the honor to communicate the following.

In accordance with the Agreement Between the Union of Soviet Socialist Republics and the United States of America on Exchanges in the Cultural, Technical and Educational Fields, the Soviet side proposes that, over and above the technical delegations set forth in the Agreement, an additional exchange be made in 1958 of delegations of specialists in designing and manufacturing pipe-rolling mills and in producing pipes.

It is proposed that the delegations be composed of 10 persons on each side.

The duration of the visit by each delegation would be from three to four weeks.

The Soviet specialists would like to visit the following enterprises in the United States:

- 1. The National Tube Co. \_\_ the plants in Lorain and Morrisville, Chio.
- The Youngstown Sheet and Tube Co. -- the plants in Hubbard,
   Chio, and Indiana Harbor, Indiana.
  - 3. The Kaiser Steel Co. -- the plant in Fontana, California.
- 4. The babcock and Wilcox Co. -- the plant in Beaver Falls, Pennsylvania.
- 5. The United States Steel Corporation -- the plant in Provo, Utah.
- 6. The Armco Steel Corporation in Middletown, Chio Approved For Release 2002/05/01: CIA-RDP61-00391R000100180018-2

-2-

7. The Chio Seamless Tube Co. -- the plant in Shelby, Chio.

In addition to the firms mentioned above, the Soviet specialists would like to visit the designing bureaus and the plants of the following machine-building firms, which design and manufacture piperolling and pipe-welding equipment:

- 1. The Ethna Standard Engineering Co. in Pittsburgh, Pengeylvania.
- 2. The Yoder Engineering Co. in Cleveland, Chio.
- 3. The Mannesman-Meer Engineering and Construction Co. in Easton, Pennsylvania.

The American specialists could visit similar enterprises in the USER.

The Embassy would appreciate it if the Department of State would reply to these proposals of the Soviet side.

Washington, March 31, 1958

(Initialed)

Department of State,

United States of America, Washington, D.C.

Request for Intelligence Evaluation: Proposed Exchange in the Field of Thrift Institutions.

Mr. Grover W. Ensley, Executive Vice President of the National Association of Mutual Savings Banks of the United States, has suggested an exchange with the Soviet Union in the field of thrift institutions. An American delegation of about six members of the Committee on International Savings Bank Cooperation of the Association would like to visit the Soviet Union for about three weeks in mid-1959 to confer with various Soviet agencies and managers of thrift institutions to get a clear understanding of the policies and operating methods of these institutions. The Association would be prepared to offer reciprocity to a Soviet delegation.

The Association is prepared to cooperate closely with the U. S. Government. The project will come up for consideration at a meeting of Association officials in September 1958, and Mr. Ensley would appreciate receiving guidance before September 1. Mr. Ensley does not plan to approach any Soviet official until after further consultation with P/ENC.

It is requested that IAC be requested to provide the usual intelligence evaluation, proposed itineraries in the U.S. and the U.S.S.R., and other comments it may consider relevant.

(NOTE: The following is the body of a letter from the Technical Program Chairman of the "Southwestern IRE Conference and Electronics Show" to East-West Contacts Staff/Department of State.)

P Y

4 August 1958

The eleventh Annual Southwestern IRE Conference and Electronics Show is interested in the possibility of obtaining Soviet speakers in the field of electronics and allied sciences for its technical program. Dates for the meeting are April 16-18, 1959. The conference is to be held at the new Dallas Memorial Auditorium in Dallas, Texas, and will be under the sponsorship of the Dallas Section of the Institute of Radio Engineers. No classified papers are to be included in the technical program. Chairmen of the conference is Mr. D. J. Tucker, Manager, Radio Station WRR, Dallas, Texas, and Technical Program Chairman is the writer, address shown.

It is our understanding that your section of the State Department has cognizance in such metters and will give us suggestions as to the correct procedure for obtaining these speakers if possible. We understand that one limitation hinges on whether or not Dallas is considered an open city for this sort of activity, and we would appreciate your informing us on this point.

Although the scope of subject matter for the technical conference is limited only to electronics and related fields, we would be particularly interested in Soviet visitors who could speak authoritatively on (1) new communication techniques, (2) data systems and computing techniques, (3) applications of solid state devices, and (4) new developments in audio.

As the nature of our entire technical program will depend in large measure on whether or not it will be possible to feature Soviet scientists as guest speakers, we must have a yes/no answer within the next six weeks at latest. Accordingly we shall appreciate an early and, we hope, favorable reply. We will make no inquiries through the National Science Foundation, Soviet Embassy, or elsewhere until we shall have heard from you.

Thank you for your effort in this matter.

Very truly yours,

/8/

FRANK SEAY Technical Program Chairman
